Not All Double Glazing is the Same

TwinGlaze[®] includes Exterior and Interior Toughened Safety Glass, an Argon Gas Infill and Low 'E' Coating to achieve an industry best **U 1.63 Thermal Performance Rating**.

TwinGlaze[®] High Performance Double Glazing delivers **DOUBLE** the thermal performance and **DOUBLE** the energy efficiency savings of standard double glazing.

Exterior and Interior Toughened Safety Glass

Toughened glass, also known as tempered glass is four to five times stronger than standard glass and will crumble uniformly into small fragments or pebbles, rather than splintering into dangerous shards if struck by an extremely hard impact.

Energy Efficient Argon Gap

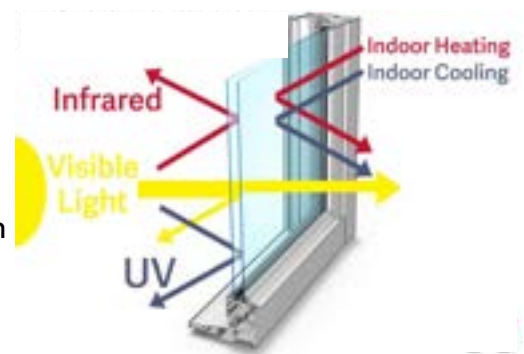

Double Glazing energy efficiency is significantly enhanced by filling the gap between the two glazing panes with Inert Argon Gas instead of common dehydrated air.

TwinGlaze[®] Includes Special Low 'E' Glazing

Low-E is a transparent nano-metallic coating that is infused onto the TwinGlaze[®] interior pane of glass to provide enhanced thermal performance.

Low-E reflects direct radiant heat and UV away from your home in Summer, while indoor heat is reflected back into your home in Winter to boost thermal performance.

Double Glazing Savings are available direct from the manufacturer!

Double Glazing Your Existing Windows makes TwinGlaze[®] easy to install and the most cost effective way to enjoy the energy savings and environmental benefits of Genuine Double Glazing.

- Includes removal and recycling of your existing glass and installation of High Performance TwinGlaze[®] Double Glazing into your existing windows and doors.
- **Sliding Windows & Doors** Includes complimentary replacement of your seals and rollers with thermal and acoustic brush seals and easy to glide rollers.
- **Awning and Hinged Windows & Doors** Includes complimentary replacement of your existing seals with thermal and acoustic compression seals.
- A manufacturers **Production Volume Discount** of up to 22% will be applied to your order according to the number of windows and doors you decide to double glaze.
